IT Services for Engineering Firms

Establish IT Systems that Are More Secure, Reliable, and Better Performing with CADapult ITeam IT Services for Engineering Firms.

In the late 1980s and 1990s, information technology (IT) dramatically changed the civil and structural industry. One by one, engineers abandoned their drafting boards and manual tools for workstations and software tools such as AutoCAD, Civil 3D and Revit, for obvious reasons: convenience , time-savings, and increased productivity. With a growing reliance on computing, came a growing reliance on IT networks to transmit virtually everything from electronic files of engineering drawings to emails.

Along with this solution, however, came new IT challenges:

- How do engineering firms manage increasingly complex, rapidly evolving networks with maximum effectiveness?

- How could they make the networks work for them instead of—as was often the case—against them?

Call the CADapult ITeam today to find out how to overcome these challenges as well as the challenges your IT infrastructure may be facing.

What Our Clients Say

"Just as LANDMARK/JCM takes pride in its excellent performance record in satisfying clients' needs, CADapult ITeam has consistently provided us with excellent service. The CADapult ITeam played an integral part, combined with our IT Department, during the merger of Landmark Engineering and JCM Environmental with integrating both companies' networks. CADapult's expertise, responsiveness and flexibility are invaluable to our firm."

- Bruce Tease, President,
Landmark Engineering/JCM Environmental
